

FEDERAL BUILDING – TORINO, ITALY

Competition

enrico molteni architecture

Year: 2018
Site: Torino, Italy
Project: Enrico Molteni

The theme of the project is the definition of a new a new REPRESENTATIVE building for the city of Turin. The architectural proposal is expressed on the figure of the square, a stable, pure, symbolic form.

The building looks like a SIMPLE and compact mass but at the same time articulated and TRANSPARENT.

The response to the complex program of functional areas is very clear:

A unitary parallelepiped is in turn composed of 5 independent units (homogeneous areas of tenants), separated from each other by 3m wide cracks
